EXPERIENCE

Operation Intelligence — Micron Technology | *Data Analytics Engineer*

Aug 2026 – Present

- Engineered and maintained robust data pipelines... [Add your 2-year achievements here]
- Optimized... [Add impact metrics here]

Climate Impact X | *Data Engineer Intern*

Jan 2026 – May 2026

- Invited to return for a second term; recognized for technical ownership, proactiveness, and effective communication
- Led migration of legacy SQL pipelines to dbt and implemented a materialization strategy, reducing Snowflake compute costs by 86% (from 66 to 9 mins)
- Developed dbt tests and monitoring dashboards to visualize data pipeline health, flagging 7 major SQL logic errors

Climate Impact X | *Data Engineer Intern*

Jan 2025 – Jun 2025

- Built 18 automated ETL pipelines (Airflow, PySpark, Azure) to ingest data from multiple sources into Snowflake and MongoDB, saving 10+ manual hours weekly
- Refactored Snowflake schema by consolidating 40+ views into a Medallion Architecture, significantly improving data lineage and fixing schema redundancies
- Engineered 2 CI/CD pipelines (Bash, Azure DevOps) to automate Azure deployments and ensure environment parity

Carbon GPT | *Environmental Engineer Intern*

May 2024 – Aug 2024

- Built 4 LLM prototypes (Streamlit, Groq API) to automate manual processes, used in sales pitches to UOB, CIMB, and Bursa
- Developed ETL pipeline (Python, PostgreSQL) to process 1.5M+ records, optimizing database scalability for analysis
- Led client engagements to gather technical requirements, ensuring product alignment with user feedback

SKILLS

Languages: Python (Pandas, NumPy, FastAPI), SQL, Java, R

Data Stack: Apache Spark (PySpark), Apache Airflow, Kafka, dbt, Snowflake, Databricks, PostgreSQL, MongoDB

Cloud, ML & BI: AWS, Azure, Docker, Git, CI/CD, PyTorch, Scikit-learn, Power BI, Excel

Certifications: AWS Certified Cloud Practitioner, Databricks Certified Data Engineer Associate

PROJECTS

Local Snowflake SQL Transpiler | *DuckDB, sqlglot, Python*

- Developed a local Snowflake SQL execution environment (DuckDB) for fast, cost-free query testing

Real-Time Stock Streaming Dashboard | *Kafka, Streamlit*

- Developed a real-time stock trading simulator (Kafka, Streamlit) to stream and visualize high-frequency data

Weather Analytics ELT Pipeline | *AWS Lambda, S3, Redshift*

- Built a cloud-native ELT pipeline (AWS Lambda, S3, Redshift) to analyze Singapore weather trends

SGX Derivatives Data Downloader CLI | *Python*

- Built a Python CLI tool to automate SGX derivatives data retrieval with retry, logging, and scheduling support

EDUCATION

Georgia Institute of Technology

Master of Science, Computer Science (Computing System)

Aug 2026 – Present

National University of Singapore

Bachelor of Engineering (Hons), Environmental Engineering & Data Analytics

Aug 2022 – Jun 2026

- Academics:** GPA: 4.46/5.0 (Distinction) | ASEAN Scholarship Recipient
- Athlete:** Won 7 medals (2 Gold, 3 Silver, 2 Bronze) representing NUS College in Chess, Basketball, and Captain's Ball
- Project Member:** Developed 2-year roadmap and launched BYOC campaign to reduce single-use waste in Cambodia
- Planning Committee:** Co-organized a 2-week symposium hosting 150 students from 10 ASEAN countries
